

# LIST OF MAPS, FIGURES AND TABLES

## Maps

4.1	Aeta settlements in Zambales	131
5.1	The southern Draa Valley and the area of investigation	151
6.1	Senegal and the area of investigation	177
7.1	The Polynesian Kingdom of Tonga in the southwestern Pacific Ocean	201
7.2	Potential for territorial conflicts	210
8.1	Localisation of the district Huancar in northwestern Argentine	223
8.2	Pasture areas of the households with their homesteads	228
9.1	Lethakeng village: land use pattern	262
9.2	Lethakeng village	263
11.1	The South-Indian state of Kerala and the area of investigation	306
12.1	Southern Thailand and the places of investigation	328

## Figures

2.1	Association of risk management strategies and types of everyday morality	101
3.1	Human cause (Germany). Percentage of participants who rated the cause as anthropogenic for all three conditions of the experiment	118
3.2	Human cause (Tonga). Percentage of participants who rated the cause as anthropogenic for all three conditions of the experiment	119
5.1	The bipolar tribal system in Tiraf	153
8.1	Risks of the annual production cycle	224
8.2	Composition of a patrifocal household (household 36)	226

8.3	Composition of a matrifocal household (household 10)	227
8.4	Ownership of animals (household 36)	238
9.1	Mean annual rainfall in Botswana (1960–1979)	252
9.2	Urban-rural disparities in human poverty in Botswana 1996	253
12.1	Number of denotations and assessments of pictorial elements in photo 12.1	334
12.2	Number of denotations and assessments of pictorial elements in photo 12.2	335
12.3	Assessment of selected pictorial elements in photo 12.1 by type of interviewee (accumulated in percent)	336
12.4	Assessment of selected pictorial elements in photo 12.2 by type of interviewee (accumulated in percent)	337
12.5	Estimation of environmental awareness of tourists and of Thais	339
12.6	Number of denotations of present and future positive effects of tourism*	340
12.7	Number of denotations of negative effects of tourism*	341
12.8	Responsibility allocations through the interviewees by type of interviewee as answer to the question of positive or negative effects of tourism on the environment	342
12.9	Ways of waste disposal by different types of interviewees	345

## **Photos**

Photo 12.1	Pattaya Beach	332
Photo 12.2	Waste in front of a tourist hut – Bophut Beach / Ko Samui	333

## Tables

2.1	Morality, spheres of interpretation and social relations: summary of local levels	85
2.2	The three levels of action	88
2.3	Contextualised ideal types of moral judgments (everyday type)	89
2.4	Stance towards the competing orientation and (contextualised) moral levels	96
2.5	Attitudes towards consumers and (contextualised) moral levels	98
2.6	Moral judgement and different groups of interviewees	100
2.7	Moral judgement and different groups of interviewees	101
3.1	Material used in the experiment in Germany	117
3.2	Material used in the experiment in Tonga	118
5.1	The effects of drought on herding and agriculture respectively in the study area (1991–2003)	156
7.1	Example of a person's categorisation as subsistence fisher (Lofanga)	208
7.2	Example of a person's categorisation as commercial fisher ('Uiha)	209
12.1	Types and numbers of those interviewed	330
12.2	Waste sorters among the interviewees (in percent)	344
13.1	Namibia's Biodiversity as estimated by the National Biodiversity Task Force (see Griffin and Barnard 1996: 123)	355
13.2	Excerpt from sample consultation with a fire control expert system (GEOKAK, see Walker, Davis and Gill 1985)	365
